

BACKYARD FOOD FORESTS

*Learn how to create a beautiful and
productive Garden using Permaculture
Principles*

Larry Saltzman specializes in Mediterranean Food Forests. He and his wife Linda have a 20 year old Food Forest in Santa Barbara. He has spoken and written extensively on Food Forests, and is President of the Channel Islands chapter of the California Rare Fruit Growers. He co-founded the Santa Barbara Organic Garden Club and is past President of the Permaculture Guild of Santa Barbara.

Larry will be joined from 2pm by **Fred Hunter**, a CA licensed landscape contractor and permaculture designer. He creates Mediterranean-style gardens through the business he founded, *Dreamscape Santa Barbara*, is the landscape consultant for a 90-acre development in Costa Rica, and teaches Landscape Construction at SB City College. Fred guided us through our rainwater harvesting projects.
